X-Alliance in a Nutshell:

As the official successor of the worldwide Philips X-ray OEM component business, X-Alliance continues customer support and supplies as well as system integration support services.

We offer comprehensive radiographic and fluoroscopic hands-on X-ray training programs to get deep insight knowledge of components and radiographic systems.

Course Portfolio:

We have our own training premises in Hamburg/Germany or up on request on customer site. We provide training at the intersection of technology and service support.

Typical content of the training course are:

- Theoretical knowledge
- Hands-on sessions in the X-ray test room
- Trouble shooting of most common service issues
- Application
- Technical service
- Spare part integration handling

Our diploma and certificate courses consist of a max. of 6 participants and last from 1-2 days.
